ABSTRACT:

ICT has brought vast changes to the way we work, live, and entertain ourselves, usually for the better but sometimes for the worse. Nonetheless, a large body of research has concentrated on the positive aspects of ICT. Considering that emerging research and practice commentary is beginning to focus on the potential drawbacks of ICT use and the complexity in managing ICT, this teaching seminar aims to stimulate discussion on the vulnerabilities introduced by the extraordinary invention of ICT.

BIODATA:

Carmen Leong is a Ph.D. candidate of the Department of Information Systems in the School of Computing at National University of Singapore (NUS). Her research interests include IT-enabled empowerment in social studies and IT-enabled embeddedness in organizational IT management.

FACULTY DISCUSSANT: Dr. Sharon Tan
